

## PreHCM Portal

### Portal for secure data exchange in mobile communications

Digitalisation of process coordination between participating telecommunications companies

#### Future-oriented deployment of the PreHCM portal thanks to modular scalability

- **KDS Module** - Co-user platform for complex roof sites
- **WhiteSpot** - Coordination platform to cover WhiteSpots (Germany)
- **Operator Agreements** - Tool for managing national and international operator agreements
- **broaDBand** - Coordination platform for coverage of WhiteSpots along railroad lines (Germany)
- **GSM-R** - Fault management platform for railway mobile network operators and operators of regular mobile phone networks

#### Our services in portal development for you:

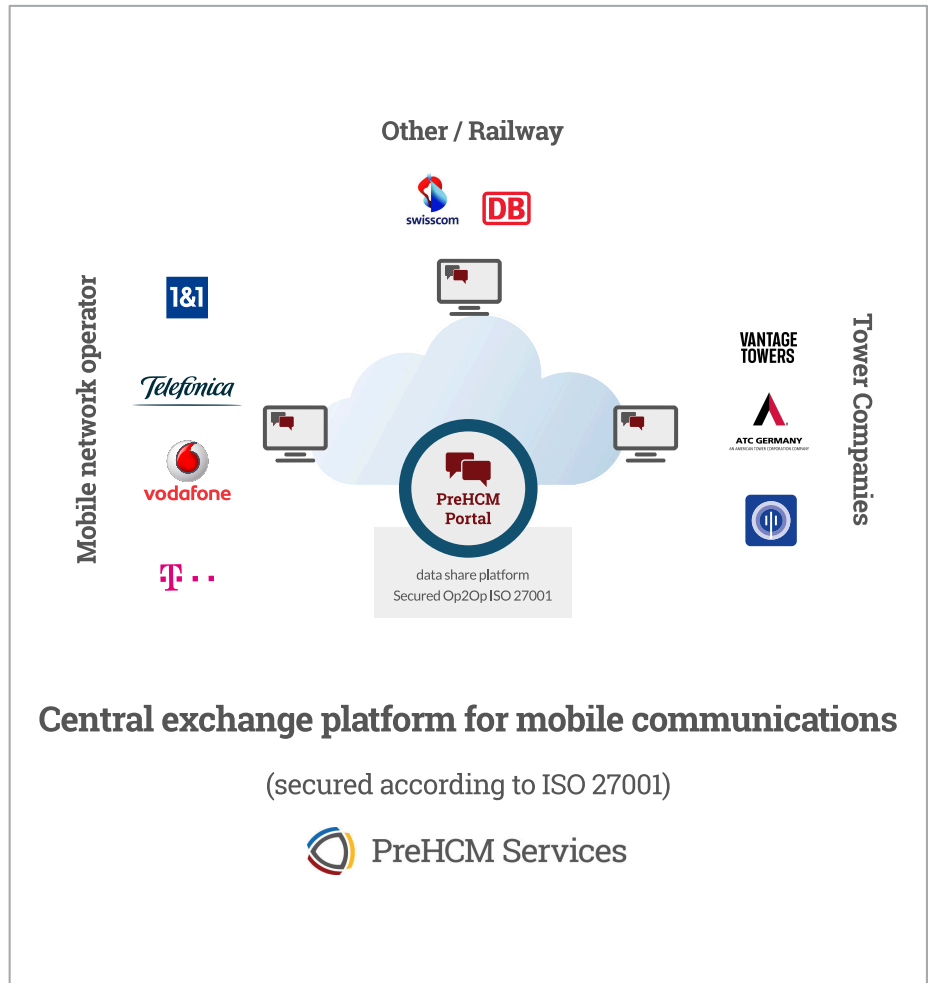

- Process modeling and standardisation with all parties involved
- Process automation, workflow and improvement
- Process integration and connection to the tools of the users (Open API)
- Module development according to modern standards
- Additional services (reporting, monitoring, operation)

#### Quality gain through automation

Automated interfaces are used to provide neutral reporting and shorten lead times. The process progress (status model) can thus be seamlessly integrated into the planning process of those involved.

#### State of the Art - Security

Safety requirements coordinated with all users and compliant with their requirements

### Central exchange platform for mobile communications

(secured according to ISO 27001)
